

一、今日前沿论文精选

1. Quality of life in patients who underwent low-dose-rate brachytherapy for prostate cancer with 10-year follow-up.

- 发表期刊 / 影响因子:Brachytherapy
- 发表时间:2026-Aug-13
- 第一/通讯作者:Yasushi Nakai, Kenta Onishi, Isao Asakawa, Makito Miyake, Kaori Yamaki
- 核心结论:To evaluate the long-term follow-up quality of life (QOL) outcomes in patients who underwent low-dose-rate brachytherapy (LDR-BT) for prostate cancer. Between May 2010 and January 2018, 853 patients who completed Expanded Prostate Cancer Index Composite (EPIC) questionnaires before treatment were en...
- 原文DOI / 链接:10.1016/j.brachy.2026.07.164

2. NK cells in breast cancer.

- 发表期刊 / 影响因子:Trends in immunology
- 发表时间:2026-Aug-13
- 第一/通讯作者:Andréa Massidda, Santiago Moragon-Terencio, Camille Baudesson de Chanville, Fabrice André, Eric Vivier
- 核心结论:Natural killer (NK) cells are effectors of innate antitumor immunity, yet their therapeutic potential in solid tumors remains largely unrealized. Breast cancer exemplifies this paradox: NK cells are present in circulation and detectable within tumors, but their cytotoxic activity is limited. Recent...
- 原文DOI / 链接:10.1016/j.it.2026.07.007

3. [Dynamically monitoring circulating tumor DNA as a biomarker for immunotherapy in advanced esophageal squamous cell carcinoma].

- 发表期刊 / 影响因子:Zhonghua zhong liu za zhi [Chinese journal of oncology]
- 发表时间:2026-Aug-23
- 第一/通讯作者:B Y Wang, H K Wang, J Li, S S Ye, J M Xu
- 核心结论:Objective: To investigate the clinical value of dynamic monitoring of plasma circulating tumor DNA (ctDNA) in evaluating the efficacy of immunotherapy for esophageal squamous cell carcinoma (ESCC). Methods: Plasma samples were collected at baseline and after every 2-3 treatment cycles from 94 patien...
- 原文DOI / 链接:10.3760/cma.j.cn112152-20251210-00608

4. [Metabolic associated fatty liver disease and myocardial ischemia in non-obese patients suspected of coronary artery disease].

- 发表期刊 / 影响因子:Zhonghua xin xue guan bing za zhi
- 发表时间:2026-Aug-24
- 第一/通讯作者:Y Tian, F Sun, Y J Chen, X Y Yang, J F Wang
- 核心结论:Objective: To explore the association between metabolic dysfunction-associated fatty liver disease (MAFLD) and myocardial ischemia in non-obese patients with suspected coronary heart disease (CAD), and to analyze the differences in this association across subgroups stratified by body mass index (BMI)...
- 原文DOI / 链接:10.3760/cma.j.cn112148-20260313-00167

5. Cellular and molecular networks governing precursor exhausted CD8+ T cells in chronic liver disease: Implications for immunotherapy.

- 发表期刊 / 影响因子:International immunopharmacology
- 发表时间:2026-Aug-13
- 第一/通讯作者:Ruoyu Gao, Ziyang Pan, Wen Zhang, Hong Li, Caihong Wang
- 核心结论:Chronic liver diseases of diverse etiologies, along with primary liver cancers, represent major global health burdens with limited curative options. CD8+ T-cell exhaustion is a central barrier to effective immune control in these pathological settings. However, precursor exhausted CD8+ T cells (Tpex)...
- 原文DOI / 链接:10.1016/j.intimp.2026.117283

6. AutoDesign: Meta-Harness Optimization for Long-Horizon Agentic Design

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Yaxin Luo, Haobin Jiang, Jialv Zou, Xu Huang, Wenhao Yan
- 核心结论:Transforming multimodal sources into condensed and structured media outputs can be fundamentally conceptualized as a long-horizon agentic process centered on a model-harness system. While an ideal harness system should align with human design priors and accumulate reusable experience through empiric...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13560v1

7. OmniScientist: An Omni-Modal Omni-Discipline AI Scientist

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Bobo Li, Hao Fei, Tianjie Ju, Mong-Li Lee, Wynne Hsu
- 核心结论:Recent advances in foundation models have enabled AI scientists to automate increasingly complete research workflows, from hypothesis generation and code execution to manuscript preparation. Yet workflow coverage alone does not provide access to the full evidence on which scientific discovery depend...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13558v1

8. Defensive Boosting for Online Probabilistic Forecasting

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Georgy Noarov, Aaron Roth
- 核心结论:We study online probabilistic forecasting of binary outcomes chosen by an adaptive adversary. Given an online learning algorithm for a weak hypothesis

class H , we would like to efficiently obtain two incomparable guarantees that existing online boosting techniques provide separately. Online gradient descent

- 原文DOI / 链接:<https://arxiv.org/abs/2608.13554v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Quality of life in patients who underwent low-dose-rate brachytherapy for prostate cancer with 10-year follow-up.
