

一、今日前沿论文精选

1. Complete pathological response after neoadjuvant chemoimmunotherapy in PD-L1-negative unresectable primary hepatic small cell carcinoma: a case report and tumor microenvironment analysis.

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Yupeng Hong, Sifu Yang, Yuchen Zhong, Yuan Chen, Liu Yang
- 核心结论:Primary hepatic small cell carcinoma (PHSCC) is an extraordinarily rare and aggressive malignancy with a dismal prognosis. No standard treatment exists, and the role of immunotherapy in this tumor type, especially in programmed cell death ligand 1 (PD-L1) negative cases, remains unexplored. A 55-yea...
- 原文DOI / 链接:10.3389/fimmu.2026.1901608

2. Case Report: Can this 90-year-old patient with cT4N3M0 NSCLC have concurrent chemoradiation for cure? Learning from a representative case.

- 发表期刊 / 影响因子:Frontiers in oncology
- 发表时间:2026
- 第一/通讯作者:Cuiheng Tian, Jinliang Zhang, Wenji Pu, Shing Cheung Mathew Yik, Biaoda Li
- 核心结论:It is challenging to manage locally advanced non-small cell lung cancer (NSCLC) in patients older than 85 years, as there is neither a guideline nor evidence for guidance. Most clinical trials excluded this population for enrollment. Here we report a case of a 90-year-old former smoker with squamous...
- 原文DOI / 链接:10.3389/fonc.2026.1896102

3. Metaplastic breast cancer: a clinicopathological analysis of nine cases highlighting diagnostic challenges and aggressive behavior.

- 发表期刊 / 影响因子:Frontiers in oncology
- 发表时间:2026
- 第一/通讯作者:Yuan Shao, Binghua Kan, Yanni Li, Qing Zhou, Guiru Yan
- 核心结论:Metaplastic breast cancer (MBC) is a rare and highly heterogeneous subtype of breast cancer associated with limited treatment options and a poor prognosis. We aimed to characterize the clinical features, pathological findings, treatment patterns, and outcomes of patients with MBC. This single-center...
- 原文DOI / 链接:10.3389/fonc.2026.1852513

4. Plant-Derived Exosome-like Nanovesicles for Metabolic Dysfunction-Associated Steatotic Liver Disease.

- 发表期刊 / 影响因子:Veterinary sciences
- 发表时间:2026-Aug-22
- 第一/通讯作者:Tinghong Kuang, Lijun Wang, Yaning Shi, Ji Cheng, Shifeng Pan
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is one of the most prevalent chronic liver diseases worldwide, involving multiple pathological mechanisms such as lipid metabolism disorders, oxidative stress, chronic inflammation, insulin resistance, and dysregulation of the gut-live...
- 原文DOI / 链接:10.3390/vetsci13090851

5. Heavy Metal-Induced Hepatic Inflammation: Mechanistic Pathways, Epidemiological Evidence, and the Emerging but Unvalidated Role of Plant-Based Dietary Strategies.

- 发表期刊 / 影响因子:Toxics
- 发表时间:2026-Sep-07
- 第一/通讯作者:Jonah Bawa Adokwe, Phisit Pouyfung, Noriyoshi Ogino, Wantanasak Suksong, Supabhorn Yimthiang
- 核心结论:Chronic exposure to cadmium (Cd), lead (Pb), and mercury (Hg) has been associated with hepatic inflammation and metabolic liver dysfunction in experimental and epidemiological studies. Experimental evidence indicates that these metals can disrupt redox homeostasis, impair mitochondrial function, sup...
- 原文DOI / 链接:10.3390/toxics14090793

6. LLM Agents Can Easily Tamper With Their Own Traces

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Jeremy Qin, David Schmotz, Derck Prinzhorn, Luca Beurer-Kellner, Ameya Prabhu
- 核心结论:Asynchronous monitoring, incident investigations, and compliance audits primarily rely on agent traces to reconstruct what happened. These analyses assume that LLM agents cannot tamper with their own execution traces. We show that local LLM agents such as Claude Code, Codex, Antigravity, Open Code a...
- 原文DOI / 链接:https://arxiv.org/abs/2609.30266v1

7. AD-WM: Action-Discriminative World Models for Counterfactual Model Predictive Control

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Jiabing Qiu, Zixuan Chen, Hongye Cao, Jieqi Shi, Jing Huo
- 核心结论:Latent world models are typically trained to predict factual transitions, whereas model predictive control (MPC) must compare alternative actions from the same state. A model can therefore achieve low factual prediction error yet poorly distinguish candidate actions. We introduce AD-WM, an action-di...
- 原文DOI / 链接:https://arxiv.org/abs/2609.30264v1

8. Temporal Gradient Inversion for Private Trajectory Reconstruction in Embodied Reinforcement Learning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24

- 第一/通讯作者:Sudip Bhujel, Shanghao Shi, Ruiquan Huang, Ning Zhang, Yang Xiao
- 核心结论:Distributed learning in embodied reinforcement-learning agents offers a degree of privacy by retaining raw sensor data on-device and transmitting only policy gradients to the server. Yet temporal structure can amplify this leakage beyond single-frame attacks. We introduce Temporal Reconstruction Att...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.30258v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Complete pathological response after neoadjuvant chemoimmunotherapy in PD-L1-negative unresectable primary hepatic small cell carcinoma: a case report and tumor microenvironment analysis.
