

一、今日前沿论文精选

1. Pathologic complete response after first-line tislelizumab, cetuximab, and dabrafenib in microsatellite-stable BRAF V600E-mutant metastatic colorectal cancer: a case report.

- 发表期刊 / 影响因子:Anti-cancer drugs
- 发表时间:2026-Sep-30
- 第一/通讯作者:Rong Li, Yanping Lin, Jiangyan Guo, Junyi Qian, Mingjin Wu
- 核心结论:BRAF V600E-mutant metastatic colorectal cancer (mCRC) is characterized by aggressive disease behavior and limited responsiveness to conventional systemic therapy. Although BRAF/EGFR-targeted therapies have improved clinical outcomes, durable complete remission remains uncommon, particularly in micro...
- 原文DOI / 链接:10.1097/CAD.0000000000001846

2. Expanding dose and dose-rate capabilities of a synchrotron-based pre-clinical proton FLASH irradiation platform.

- 发表期刊 / 影响因子:Medical physics
- 发表时间:2026
- 第一/通讯作者:Zongsheng Hu, Yuting Li, Xiaochun Wang, Radhe Mohan, Uwe Titt
- 核心结论:Proton FLASH radiotherapy has demonstrated promising normal tissue sparing for similar tumor control at ultra-high dose rates (> 40 Gy/s), but systematic investigation of dose-rate-dependent biological mechanisms is limited. Most existing proton platforms operate within a narrow dose-rate range. Syn...
- 原文DOI / 链接:10.1002/mp.70695

3. Integrated multi-omic analysis characterizes an IFN γ -responsive-to-myeloid-suppressive immune continuum in immune-active hepatocellular carcinoma.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Luping Lin, Ningna Weng, Huaying Lai, Guangfeng Wu, Jinfeng Lin
- 核心结论:Immune-active hepatocellular carcinoma (HCC) is commonly treated as a single inflamed phenotype, although its internal immune heterogeneity remains incompletely defined. We integrated public bulk transcriptomic, single-cell, spatial transcriptomic, proteomic, phosphoproteomic, and treatment-cohort d...
- 原文DOI / 链接:10.1371/journal.pone.0359327

4. Sex- and hepatocyte PPAR γ -dependent effects of an obesogenic dietary approach to induce MASH with fibrosis in mice.

- 发表期刊 / 影响因子:American journal of physiology. Gastrointestinal and liver physiology
- 发表时间:2026-Oct-06
- 第一/通讯作者:Marta Sierra-Cruz, Izabela Hawro, Samuel M Lee, Jose Muratalla, Jose Cordoba-Chacon
- 核心结论:Mouse models of metabolic dysfunction-associated steatotic liver disease (MASLD) are valuable tools for identifying novel molecular mechanisms that drive progression from MASLD to metabolic dysfunction-associated steatohepatitis (MASH). However, developing a robust MASLD/MASH mouse model with obesit...
- 原文DOI / 链接:10.1152/ajpgi.00117.2026

5. siRNA therapeutics for metabolic dysfunction-associated Steatohepatitis: Targets, delivery, clinical evidence, and translational challenges.

- 发表期刊 / 影响因子:Biochemistry and biophysics reports
- 发表时间:2026
- 第一/通讯作者:Yanan Guo, Qunyan Yao
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most prevalent chronic liver disease worldwide. Its progressive inflammatory form, metabolic dysfunction-associated steatohepatitis (MASH), is driven by interacting genetic, metabolic, inflammatory, and fibrogenic processes that...
- 原文DOI / 链接:10.1016/j.bbrep.2026.102817

6. Partially Observable Zero-shot coordination by Predicting Intention of Partner

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-06
- 第一/通讯作者:Jinnyeong Yang, Yuhwan Jeong, Hoyong Kwon, Minseok Kim, Jihun Kim
- 核心结论:Zero-shot coordination in embodied settings requires acting while the partner is intermittently out of view, leaving existing methods with ambiguous partner representations and uncertainty over hidden partner states. We propose Predicting Intention of Partner (PIP) to jointly address these challenge...
- 原文DOI / 链接:https://arxiv.org/abs/2610.08142v1

7. Test-Time Agent Evolution for Long-Horizon Legal Reasoning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-06
- 第一/通讯作者:Haotian Chen, Shuaicheng Niu, Haocong Rao, Kaisong Song, Jun Lin
- 核心结论:Legal intelligence aims to support reliable decision-making across long-horizon legal processes involving evolving case states and multiple roles. However, real-world legal deployment exhibits substantial case heterogeneity in facts, evidence, and procedural contexts, exposing the limitations of sta...
- 原文DOI / 链接:https://arxiv.org/abs/2610.08138v1

8. Beyond Marginal Monitoring: Distributed Joint-Distribution Testing for Data Concept Drift in Large Scale E-Commerce Operations

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-06
- 第一/通讯作者:Cagdas Pullu, Mahmut Emir Arslan, Bugra Balkac, Aylin Ondersev Balta, Cihangir Celal Palaci
- 核心结论:Concept drift threatens production machine learning, yet the empirical behavior of multivariate two-sample drift detectors at scale remains under-characterized. Existing benchmarks rarely address the hundreds of millions of rows and high-cardinality features typical of industrial-operational dataset...
- 原文DOI / 链接:<https://arxiv.org/abs/2610.08132v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Pathologic complete response after first-line tislelizumab, cetuximab, and dabrafenib in microsatellite-stable BRAF V600E-mutant metastatic colorectal cancer: a case report.
