

一、今日前沿论文精选

1. Stereotactic Prostate Cancer Ablative Re-Irradiation: A Systematic Review and Meta-Analysis (SPARE).

- 发表期刊 / 影响因子:The Prostate
- 发表时间:2026-Aug-23
- 第一/通讯作者:Andre G Gouveia, Jody Tao, Gregory Pond, Kevin Dong, Allison Ye
- 核心结论:Stereotactic ablative radiotherapy (SABR) is emerging as an alternative treatment for patients with locally recurrent prostate cancer after previous radiation. This approach allows for precise target coverage while limiting toxicity to surrounding organs. However, reported outcomes following re-irra...
- 原文DOI / 链接:10.1002/pros.70233

2. Prognostic Impact of the Addition of Prostate-Directed Radiotherapy With or Without Metastasis-Directed Radiotherapy Under Upfront Doublet Therapy for High-Volume Metastatic Hormone-Sensitive Prostate Cancer.

- 发表期刊 / 影响因子:The Prostate
- 发表时间:2026-Aug-23
- 第一/通讯作者:Dai Koguchi, Hideyasu Tsumura, Ken-Ichi Tabata, Takefumi Satoh, Yutaka Shiono
- 核心结论:Radiotherapy is established as a standard treatment for low-volume metastatic hormone-sensitive prostate cancer (mHSPC), but its prognostic impact for high-volume mHSPC under upfront therapy is unclear. This study investigates the effect of adding prostate-directed radiotherapy (PDRT) with or without...
- 原文DOI / 链接:10.1002/pros.70238

3. Longitudinal computed tomography body composition changes in patients receiving curative radiotherapy for non-small cell lung cancer.

- 发表期刊 / 影响因子:Physics and imaging in radiation oncology
- 发表时间:2026
- 第一/通讯作者:Ying Zhang, Sumeet Hindocha, Arjun K Ghosh, Miguel Garrett Fernandes, Maria A Hawkins
- 核心结论:To determine whether longitudinal changes on routine thoracic computed tomography (CT) predict overall survival (OS) in non-small cell lung cancer (NSCLC) after curative radiotherapy and identify dose predictors of adverse tissue changes. We performed a retrospective, single-centre study of 231 stag...
- 原文DOI / 链接:10.1016/j.phro.2026.101055

4. Fiber-Dependent Microbiome Glycine Lipids Ameliorate Steatotic Liver Disease in Mice via Mitochondrial Enhancement.

- 发表期刊 / 影响因子:Gastro hep advances
- 发表时间:2026
- 第一/通讯作者:Liya Anto, Lidan Gao, Jaeun Lee, Chelsea Garcia, Oliver Otoko
- 核心结论:Oral and gut Bacteroidota species produce bioactive glycine lipids (GL), including the core Lipid 342, serine-glycine Lipid 654 (L654), and complex Lipid 1256 (L1256) classes. These microbiome-derived molecules are emerging modulators of host metabolism, but their dietary regulation, systemic presen...
- 原文DOI / 链接:10.1016/j.gastha.2026.101064

5. ALT/AST ratio as an early marker of metabolic multimorbidity in young adults: A community-based study.

- 发表期刊 / 影响因子:Journal of multimorbidity and comorbidity
- 发表时间:2026
- 第一/通讯作者:Yi-Hung Lin, Ming-Shyan Lin, Meng-Shu Tsai, Jr-Hau Lung, Po-Chang Wang
- 核心结论:Metabolic multimorbidity, characterized by the clustering of metabolic dysfunction-associated steatotic liver disease (MASLD, formerly NAFLD) and metabolic syndrome (MetS), is increasingly recognized in young adults and may reflect early systemic metabolic dysfunction. However, simple biomarkers for...
- 原文DOI / 链接:10.1177/26335565261476716

6. G-CARL: Grounded Checklist-Aligned Reward Learning for Patient-Oriented Medical Report Interpretation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-20
- 第一/通讯作者:Shiao Xie, Siyu Chen, Jianwei Lv, Bo Yuan, Yujin Wang
- 核心结论:Personalized interpretation of medical reports has emerged as an increasingly important need among patients. Addressing this need requires both evidence-grounded medical factuality and context-dependent patient communication, yet existing medical vision-language tasks do not adequately capture these...
- 原文DOI / 链接:https://arxiv.org/abs/2608.20331v1

7. An Agentic Approach for Active Data Collection, Travel Behavior Modeling, and Weather-Sensitive Demand Prediction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-20
- 第一/通讯作者:Narges Ahmadi, Yubo Jiao, Jônatas Augusto Manzolli, Jiangbo Yu, Luis Miranda-Moreno
- 核心结论:Travel behavior research increasingly combines digital data collection with predictive modeling, yet these stages are often developed and evaluated separately. This study proposes a three-agent workflow integrating conversational data collection, structured data processing, and behavioral prediction...
- 原文DOI / 链接:https://arxiv.org/abs/2608.20320v1

8. Information on trajectories: martingales and random times

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-20

- 第一/通讯作者:Akshay Balsubramani
- 核心结论:Accounting for information flow on the path space of trajectories of a nonnegative martingale yields exact variational identities for it, even at arbitrary random times. This recovers the widely used classical concentration inequalities, from Ville to PAC-Bayes, and measures what each one discards...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.20337v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Stereotactic Prostate Cancer Ablative Re-Irradiation: A Systematic Review and Meta-Analysis (SPARE).
