每日医学科研精读日报 | 2026年11月03日

一、今日前沿论文精选

1. Topical Esomeprazole for the Prevention and Treatment of Radiation Dermatitis in Patients With Head and Neck Cancer: Protocol for a Phase 2 Randomized Controlled Trial.

- 发表期刊 / 影响因子:JMIR research protocols
- 发表时间:2026-Nov-02
- 第一/通讯作者:Aaron Cheng, Pavela Bambekova, Yohannes T Ghebre, Mark D Bonnen, Timothy Wagner
- 核心结论:Radiation dermatitis (RD) is a common and clinically significant toxicity affecting the majority of patients undergoing external beam radiation therapy, particularly those treated for head and neck cancer (HNC). RD can impair quality of life, limit treatment intensity, and compromise oncologic outco…
- 原文DOI / 链接:10.2196/91035

2. Local Therapy of Metastases in Colorectal Cancer: Utilization and Survival in a Nationwide Population.

- 发表期刊 / 影响因子:JCO oncology practice
- 发表时间:2026-Nov-02
- 第一/通讯作者:Mari Fjørtoft Ystgaard, Tor Åge Myklebust, Kristoffer Lassen, Halfdan Sorbye, Inger Kristin Larsen
- 核心结论:Local therapy (LT) for metastatic colorectal cancer (mCRC) is recommended when eradicating all metastases is feasible. Although LT is widely used, its population-level impact remains unclear. This study aims to use real-world population-based data to assess LT utilization and survival trends in mCRC…
- 原文DOI / 链接:10.1200/OP-26-00381

3. Stereotactic Ablative Radiotherapy Versus Surgical Resection for Early-Stage Non-Small Lung Cancer: An Emulated Target Trial.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Nov-02
- 第一/通讯作者:Eva Kagenaar, David G Lugo-Palacios, Ajay Aggarwal, Andrew Hutchings, Stephen O’ Neill
- 核心结论:Stereotactic ablative radiotherapy (SABR) is standard of care for inoperable early-stage non-small cell lung cancer (NSCLC), but there is little evidence to support SABR as an alternative to surgical resection. Randomized controlled trials (RCTs) have failed to recruit, and ongoing RCTs apply strict…
- 原文DOI / 链接:10.1200/JCO-26-00399

4. MRI-based biomarkers for risk stratification and assessment of treatment response in Metabolic dysfunction-associated Steatotic liver disease.

- 发表期刊 / 影响因子:Hepatology (Baltimore, Md.)
- 发表时间:2026-Nov-02
- 第一/通讯作者:Maria Mironova, Bachir Taouli, Richard L Ehman, Claude B Sirlin, Rohit Loomba
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) affects up to 38% of the population globally. Liver biopsy, the historical reference standard, is invasive, subject to sampling error and not scalable. MRI-based biomarkers provide non-invasive, quantitative whole liver assessment. MRI…
- 原文DOI / 链接:10.1097/HEP.0000000000001908

5. GLP-1 Receptor Agonists Versus Empagliflozin or Dapagliflozin in the MASLD-Heart Failure Phenotype: An Exploratory Propensity-Matched Cohort Study.

- 发表期刊 / 影响因子:Balkan medical journal
- 发表时间:2026-Nov-02
- 第一/通讯作者:Naveen Gautam, Tien Manh Huynh, Hong Hieu Truong, Nikki Duong
- 核心结论:Treatment selection may confound observational comparisons of glucagon-like peptide-1 receptor agonists (GLP-1 RAs) and sodium-glucose cotransporter-2 inhibitors (SGLT2i) in adults with metabolic dysfunction-associated steatotic liver disease and heart failure (HF). To compare recorded outcomes betw…
- 原文DOI / 链接:10.4274/balkanmedj.galenos.2026.2026-7-49

6. Character-Name Concentration in LLM Fiction: Measuring Displacement and Mitigating Repetition

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-31
- 第一/通讯作者:Alejandro Mozo Quesada, Sergio Gálvez Rojas, Francisco López Valverde
- 核心结论:Character names in large language model (LLM) fiction concentrate on a handful of recurrent names such as ‘Elara’ and ‘Elias’, a measurable face of AI slop. Existing fixes either require logit access or retraining, or operate per request and cannot control concentration across a corpus. How much pro…
- 原文DOI / 链接:https://arxiv.org/abs/2611.01284v1

7. OntoDoc: Automatically Generating Ontology Resource Descriptions

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-31
- 第一/通讯作者:Juan Guajardo Gutierrez, Mike Tran, Nasim Shirvani Mahdavi, Chengkai Li
- 核心结论:Knowledge graphs and ontologies form the backbone of structured, machine-readable knowledge representation, yet ontology terms often lack natural language descriptions, limiting their accessibility and reuse. Existing ontology verbalization approaches tend to rely on rule-based or template-driven te…
- 原文DOI / 链接:https://arxiv.org/abs/2611.01276v1

8. Accelerating posterior sampling in Bayesian inverse problems with diffusion models: an online-offline perspective

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-10-31
- 第一/通讯作者:Duc-Lam Duong
- 核心结论:Bayesian inverse problems require both informative prior models and computationally feasible posterior inference. Score-based diffusion models provide expressive learned priors, but their use for inversion introduces a conditioning problem: the score of a noised posterior is generally unavailable fr…
- 原文DOI / 链接:https://arxiv.org/abs/2611.01300v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Topical Esomeprazole for the Prevention and Treatment of Radiation Dermatitis in Patients With Head and Neck Cancer: Protocol for a Phase 2 Randomized Controlled Trial.
