每日医学科研精读日报 | 2026年10月15日

一、今日前沿论文精选

1. Neurodevelopmental Blueprint in Gliomas: Toward an Ontogenetic Multimodal Integrated Therapy.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Oct-14
- 第一/通讯作者:Luis Padevit, Tobias Weiss, Flavio Vasella, Marian Christoph Neidert, Carlo Serra
- 核心结论:Neuroepithelial tumors, including diffuse gliomas and embryonal neoplasms, remain among the most lethal cancers despite major advances in molecular diagnostics and some novel targeted therapies for subsets of patients. A persistent barrier to progress is the lack of a unifying framework that integra…
- 原文DOI / 链接:10.1200/JCO-25-02798

2. Leveraging Real-World Evidence to Drive Advances in Oncology Care in the Asia-Pacific Region: Recommendations From the Asia-Pacific Oncology Drug Development Consortium Working Group.

- 发表期刊 / 影响因子:JCO global oncology
- 发表时间:2026
- 第一/通讯作者:Herbert H Loong, Pankaj Kumar Panda, Ben Tran, Toshio Shimizu, Pei Jye Voon
- 核心结论:In an era of rapid technological advancements, the Asia-Pacific (APAC) region stands at the forefront of health care innovation, leveraging real-world evidence (RWE) to drive transformative changes. RWE, derived from real-world data such as electronic health records and patient registries, provides…
- 原文DOI / 链接:10.1200/GO-26-00217

3. Radiation Oncology at a Crossroads: Interpreting the Evidence on Proton Versus Photon Radiotherapy for Oropharyngeal Cancer.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Oct-14
- 第一/通讯作者:Sudarshan Ramanan, George Ashji, Khoi Nguyen, Danil Ratnikov, Eric J Sherman
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1200/JCO-26-01434

4. A comprehensive evaluation on the impact of MASLD on the prognosis of chronic hepatitis B-related hepatocellular carcinoma following hepatectomy: results from retrospective multicenter cohort study and meta-analysis.

- 发表期刊 / 影响因子:Hepatology international
- 发表时间:2026-Oct-14
- 第一/通讯作者:Yiyu Chen, Yangyang Ou, Kang Chen, Tianyi Liang, Jiayong Su
- 核心结论:Prognosis after radical hepatectomy for chronic hepatitis B (CHB) related hepatocellular carcinoma (HCC) is poor. Comorbidity of CHB and metabolic dysfunction-associated steatotic liver disease (MASLD) has grown increasingly common, with MASLD further modifying the hepatic microenvironment beyond HB…
- 原文DOI / 链接:10.1007/s12072-026-11151-y

5. Gliflozin-Derived SGLT2 Inhibitors: Recent Advances and Future Perspectives in the Management of Type 2 Diabetes.

- 发表期刊 / 影响因子:Current diabetes reviews
- 发表时间:2026-Oct-13
- 第一/通讯作者:Biswanath Prusty, Sudhansu Sekhar Rout, Abhijit Saha
- 核心结论:Gliflozin derivatives, a class of Sodium-Glucose Cotransporter (SGLT) inhibitors, have emerged as effective antidiabetic agents offering notable cardiovascular and renal protection. This class of compounds inhibits glucose reabsorption in the kidneys, thereby improving overall glycaemic control. Thi…
- 原文DOI / 链接:10.2174/0115733998505609261006104914

6. ChunkAct: Action Chunking for Agentic Robotics

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-13
- 第一/通讯作者:Bingxin Xu, Wenrui Bao, Xinxin Liu, Jiawei Zhou, Yuzhang Shang
- 核心结论:Agentic robotics places a large language model (LLM) agent in the robot control loop, where it composes perception, motion, and vision-language-action (VLA) tools under the guidance of a memory and thereby generalizes to new tasks without retraining. This generality comes at a steep price in efficie…
- 原文DOI / 链接:https://arxiv.org/abs/2610.18874v1

7. What Matters in Quality-Aware VLA Pretraining: A Benchmark and Empirical Study

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-13
- 第一/通讯作者:Mingxuan Yan, Litian Gong, Dihong Huang, Zhixu Li, Tianyu Zhang
- 核心结论:How should demonstration quality be used during vision-language-action (VLA) pretraining to improve performance after target-task fine-tuning? We compare weighting, filtering, and conditioning across reward definitions and label granularities using 5,000 naturally suboptimal human demonstrations and…
- 原文DOI / 链接:https://arxiv.org/abs/2610.18869v1

8. Cepheid: Decoupling Scale from Structure for Cross-Family Motion Completion

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-13

- 第一/通讯作者:Chih-Hai Su, Tsung-Wei Ke, Yu-Lun Liu
- 核心结论:Sparse-to-dense motion completion recovers dense mesh motion from sparse vertex displacements. Residual priors trained on one geometry family frequently fail to beat parameter-free harmonic extension off-family. Moreover, cross-family training meets a scaling barrier: residual amplitude varies by mo…
- 原文DOI / 链接:https://arxiv.org/abs/2610.18871v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Neurodevelopmental Blueprint in Gliomas: Toward an Ontogenetic Multimodal Integrated Therapy.
