## 一、今日前沿论文精选

**1. Association between operability and clinical outcomes in patients with stage I NSCLC treated with carbon-ion radiotherapy: a Japanese National Registry Study (J-CROS-LUNG).**

- 发表期刊 / 影响因子:Journal of radiation research
- 发表时间:2026-Oct-27
- 第一/通讯作者:Nobuteru Kubo, Hiroaki Suefuji, Mio Nakajima, Sunao Tokumaru, Takeru Ohtaka
- 核心结论:Carbon-ion radiotherapy (CIRT) is a non-surgical treatment option for early-stage non-small cell lung cancer (NSCLC). However, the association between operability and outcomes in real-world CIRT cohorts has not been systematically evaluated. This study aimed to evaluate the association between clini…
- 原文DOI / 链接:10.1093/jrr/rrag090

**2. Association of pretreatment immune microenvironment profile with boron neutron capture therapy efficacy in cutaneous tumors: results from an ancillary multiplex immunofluorescence study.**

- 发表期刊 / 影响因子:Journal of radiation research
- 发表时间:2026-Oct-27
- 第一/通讯作者:Masahiro Ueno, Tairo Kashihara, Satoshi Nakamura, Hana Endo, Taisuke Mori
- 核心结论:Boron neutron capture therapy (BNCT), an emerging novel radiotherapy modality, has shown immunological relevance in preclinical models. Although the safety and efficacy of BNCT for cutaneous tumors have been evaluated in a Phase I clinical trial, studies using human clinical specimens remain limited…
- 原文DOI / 链接:10.1093/jrr/rrag089

**3. Bioengineered multifunctional nanomedicine for cancer theranostics: integrating targeted drug delivery, molecular imaging, and precision medicine.**

- 发表期刊 / 影响因子:The Journal of pharmacy and pharmacology
- 发表时间:2026-Oct-01
- 第一/通讯作者:Shivangi Dubey, Sneha Prakash, Ravi K Deshwal, Manish Dwivedi
- 核心结论:Cancer remains a major global health challenge despite significant advances in diagnosis and treatment. Conventional therapies, including chemotherapy, radiotherapy, and surgery, are frequently constrained by non-specific drug distribution, systemic toxicity, multidrug resistance (MDR), and limitati…
- 原文DOI / 链接:10.1093/jpp/rgag131

**4. Redefining Cardiometabolic Disease: Expert Consensus on the CardioVascular-Kidney-Liver-Metabolic (CVKLM) Multiorgan Staging.**

- 发表期刊 / 影响因子:European journal of preventive cardiology
- 发表时间:2026-Oct-27
- 第一/通讯作者:Guillaume Baudry, Jan Biegus, Juan Carlos López-Azor, Biykem Bozkurt, Javed Butler
- 核心结论:Cardiometabolic diseases increasingly manifest as interconnected dysfunction across the heart, vasculature, kidneys, liver, and metabolic system. The global rise in obesity, insulin resistance, and diabetes, together with therapies benefiting multiple organs, has reshaped the epidemiology and unders…
- 原文DOI / 链接:10.1093/eurjpc/zwag563

**5. MASLD Cluster Derived Outcomes after Metabolic-Bariatric Surgery: a Retrospective Single-Center Analysis.**

- 发表期刊 / 影响因子:Obesity surgery
- 发表时间:2026-Oct-27
- 第一/通讯作者:Jakob Lauerer, Ann-Cathrin Koschker, Monika Rau, Andreas Geier, Christoph-Thomas Germer
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) has become the most common chronic liver disease and is strongly associated with obesity. A novel approach of categorizing subtypes of MASLD has been proposed recently. Intent of this study was to investigate the influence of these clu…
- 原文DOI / 链接:10.1007/s11695-026-08976-9

## 二、科研公众号干货

*说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:* - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

## 三、每日高分经典精读

**Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.**

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

## 四、当日总结

今日共精选5篇最新研究+1篇经典精读。关注方向:Association between operability and clinical outcomes in patients with stage I NSCLC treated with carbon-ion radiotherapy: a Japanese National Registry Study (J-CROS-LUNG).
