每日医学科研精读日报 | 2026年10月14日

一、今日前沿论文精选

1. CRISPR-Cas9 screen identifies eIF4G2 as a regulator of CD8+ T cell dysfunction.

- 发表期刊 / 影响因子:Journal of immunology (Baltimore, Md. : 1950)
- 发表时间:2026-Oct-01
- 第一/通讯作者:Erin A Holcomb, Long Jiang, Ashley N Pearson, Jadyn James, Akshay Tate
- 核心结论:CD8+ T cells directly target and kill cancer cells and are required for effective antitumor immunity. However, CD8+ T cells may become dysfunctional when exposed to chronic antigen stimulation during cancer. Dysfunction is characterized by reduced proliferation, increased expression of inhibitory re…
- 原文DOI / 链接:10.1093/jimmun/vkag187

2. Claudin 18.2: From a Tight Junction Protein to a Breakthrough Target in Solid Tumor Immunotherapy.

- 发表期刊 / 影响因子:Biomarkers : biochemical indicators of exposure, response, and susceptibility to chemicals
- 发表时间:2026-Oct-13
- 第一/通讯作者:Mohammad Bahrami, Masoud Hassanzadeh Makoui, Amir Bayat Bodaghi, Mansour Rajabi Vahid
- 核心结论:Claudin 18.2 (CLDN18.2), a tight junction protein largely confined to normal gastric mucosa, is overexpressed and mislocalized on the surface of gastric, gastroesophageal, pancreatic, and other gastrointestinal cancers. This pattern has made CLDN18.2 a leading target in solid tumor immunotherapy. Th…
- 原文DOI / 链接:10.1080/1354750X.2026.2749578

3. A guide to studying tumour-T-cell interactions using in vitro coculture assays.

- 发表期刊 / 影响因子:The FEBS journal
- 发表时间:2026-Oct-13
- 第一/通讯作者:Nooshin Khoshdoozmasouleh, Conor J Kearney
- 核心结论:T cells are central mediators of antitumour immunity and are the cellular basis of many successful cancer immunotherapies, including immune checkpoint blockade, T-cell receptor (TCR)-engineered therapies and chimeric antigen receptor (CAR) T cells. However, clinical responses remain variable, and ma…
- 原文DOI / 链接:10.1111/febs.70765

4. Editorial for “Restricted Spectrum Imaging for Diagnosis of High-Risk Metabolic Dysfunction-Associated Steatohepatitis”.

- 发表期刊 / 影响因子:Journal of magnetic resonance imaging : JMRI
- 发表时间:2026-Oct-13
- 第一/通讯作者:Marco Dioguardi Burgio, Philippe Garteiser
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1002/jmri.70564

5. Clinical and laboratory characteristics associated with ascites in patients with MASLD-related cirrhosis: a cross-sectional study.

- 发表期刊 / 影响因子:Translational gastroenterology and hepatology
- 发表时间:2026
- 第一/通讯作者:Emad S Aljahdli, Hind Fallatah, Nouf Adil Turki
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is a prevalent condition globally. It is underexplored in Saudi Arabia, particularly its clinical and biochemical factors associated with hepatic decompensation (ascites) among MASLD-related cirrhosis. The objective is to describe and…
- 原文DOI / 链接:10.21037/tgh-2026-0089

6. Can Language Models Play the Wikipedia Game?

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:Alexander Hickey, Joanna Knight, James Bishop
- 核心结论:Language models increasingly support or automate information retrieval from document collections too large to index. This task is difficult when it requires specialist linguistic or scientific knowledge. We used the Wikipedia Game to test language models on an analogous information retrieval task. I…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13948v1

7. Hide and Seek: HIDE Concepts to SEEK explanations for black box models

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:Bhanu Tokas, Rahul Nair, Rockwell Jackson, Hannah Kerner
- 核心结论:Interpreting machine learning model predictions is a central challenge, particularly for black-box vision models. Concept-based attribution methods interpret models using human-understandable concepts. Existing concept-based methods can only interpret classification and regression models. They requi…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13935v1

8. RELAGRAM: Recursive Latent Graph Model for the Capacitated Vehicle Routing Problem

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-10
- 第一/通讯作者:Vladimir Kirill Bickov, Neil Yorke-Smith
- 核心结论:Latent recursion repeatedly processes internal representations through the same neural network. Recent work has shown this approach to be effective on

structured reasoning tasks such as Sudoku and maze solving. However, whether latent recursion can support neural routing remains unclear. We introduc…

- 原文DOI / 链接:https://arxiv.org/abs/2610.15106v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:CRISPR-Cas9 screen identifies eIF4G2 as a regulator of CD8+ T cell dysfunction.
