## 一、今日前沿论文精选

**1. Real-World HRR Testing Pathways and Patterns of Detected Alterations in Prostate Cancer From the Multinational ARON-3 Study.**

- 发表期刊 / 影响因子:The Prostate
- 发表时间:2026-Oct-12
- 第一/通讯作者:Lorena Incorvaia, Veronica Mollica, Ondřej Fiala, Kazutoshi Fujita, Yüksel Ürün
- 核心结论:Homologous recombination repair (HRR) testing is increasingly relevant in prostate cancer because it identifies patients who may benefit from biomarker-guided treatment strategies, including poly(ADP-ribose) polymerase inhibitors (PARPi). However, real-world implementation of HRR testing remains var…
- 原文DOI / 链接:10.1002/pros.70269

**2. Addition of chemotherapy to radiotherapy promotes progenitor-exhausted CD8⁺ T-cell clonal dominance in head and neck cancer.**

- 发表期刊 / 影响因子:Cancer immunology research
- 发表时间:2026-Oct-12
- 第一/通讯作者:Charleen Chan Wah Hak, Anton Patrikeev, Antonio Rullan, Emmanuel C Patin, Victoria Roulstone
- 核心结论:Concomitant chemoradiotherapy (CRT) is a standard-of-care treatment for unresectable locally advanced head and neck squamous cell carcinoma (LA-SCCHN), but its immune effects, particularly relative to radiotherapy (RT) alone, remain incompletely understood. Using syngeneic murine models, we integrat…
- 原文DOI / 链接:10.1158/2326-6066.CIR-26-0706

**3. Cross database bibliometric and knowledge mapping analysis of nanoplatform mediated tumor associated macrophage reprogramming.**

- 发表期刊 / 影响因子:Discover nano
- 发表时间:2026-Oct-12
- 第一/通讯作者:Chang Su, Jiayue Gao, Boyang Li, Zehao Hong, Lucy Yue Lau
- 核心结论:Nanoplatforms are evolving from passive delivery vehicles into multifunctional engineered systems capable of remodeling the tumor microenvironment. Tumor-associated macrophages (TAMs) are important biological interfaces because of their abundance, plasticity, and roles in immune suppression and ther…
- 原文DOI / 链接:10.1186/s11671-026-04973-0

**4. Cardiovascular Complications of Chronic Liver Disease.**

- 发表期刊 / 影响因子:Circulation
- 发表时间:2026-Oct-13
- 第一/通讯作者:Seong Park, Deepak K Gupta, Manhal Izzy, Lisa B VanWagner
- 核心结论:Chronic liver disease is an increasingly prevalent and heterogeneous syndrome with important consequences for cardiovascular function. As the global burdens of chronic liver disease and cirrhosis continue to rise, cardiovascular disease has emerged as a major driver of overall morbidity and mortalit…
- 原文DOI / 链接:10.1161/CIRCULATIONAHA.126.079443

**5. Suppressor with morphogenetic effect on genitalia 7 (SMG7) drives hepatocellular carcinoma progression through context-dependent nonsense-mediated decay (NMD) dysregulation.**

- 发表期刊 / 影响因子:Molecular biomedicine
- 发表时间:2026-Oct-12
- 第一/通讯作者:Betsaida Ojeda-Pérez, Víctor J Fernández-Ramírez, María I Pozo-Relaño, Belén Gracia-Herencia, Izabela Hawro
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is a major risk factor for hepatocellular carcinoma (HCC), yet the molecular mechanisms linking metabolic stress to tumor progression remain poorly defined. RNA surveillance pathways, including nonsense-mediated decay (NMD), may repres…
- 原文DOI / 链接:10.1186/s43556-026-00577-3

**6. Can Language Models Play the Wikipedia Game?**

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:Alexander Hickey, Joanna Knight, James Bishop
- 核心结论:Language models increasingly support or automate information retrieval from document collections too large to index. This task is difficult when it requires specialist linguistic or scientific knowledge. We used the Wikipedia Game to test language models on an analogous information retrieval task. I…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13948v1

**7. Hide and Seek: HIDE Concepts to SEEK explanations for black box models**

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:Bhanu Tokas, Rahul Nair, Rockwell Jackson, Hannah Kerner
- 核心结论:Interpreting machine learning model predictions is a central challenge, particularly for black-box vision models. Concept-based attribution methods interpret models using human-understandable concepts. Existing concept-based methods can only interpret classification and regression models. They requi…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13935v1

**8. Hide and Seek: HIDE Concepts to SEEK explanations for black box models**

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09

- 第一/通讯作者:Bhanu Tokas, Rahul Nair, Rockwell Jackson, Hannah Kerner
- 核心结论:Interpreting machine learning model predictions is a central challenge, particularly for black-box vision models. Concept-based attribution methods interpret models using human-understandable concepts. Existing concept-based methods can only interpret classification and regression models. They requi…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13935v1

## 二、科研公众号干货

*说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:* - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

## 三、每日高分经典精读

**Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions**

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

## 四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Real-World HRR Testing Pathways and Patterns of Detected Alterations in Prostate Cancer From the Multinational ARON-3 Study.
